I am upset to hear that any association would attempt to remove programming that is provided by a service that I use and pay for. As a traveling photographer in the metropolitan Chicago area the constantly updated traffic reports have become a useful tool to my everyday work life. I am aware that there are AM stations dedicated to this service, but I encounter trouble trying to receive that service in many areas. Specifically, entering Illinois from the Northwest Indiana area on the construction littered 80/94 expressway. I would appreciate if there was a swift end to a bill that intends to inconvenience America's workforce, because it is obvious that these intentions hurt individuals commuting to and from work more than anyone else.
